CHINA GRENTECH WON BID FOR 100 MILLION YUAN RF ORDER

SHENZHEN, PRC — January 15, 2008 — China GrenTech Corporation Limited (NASDAQ: GRRF, “the Company” or “GrenTech”), today announced that its CDMA and WCDMA filter division has won a bid from the largest domestic PRC (People’s Republic of China) base station equipment manufacturer for the procurement of RF modules. Based on the current demand estimate of this globally renowned client, potential orders may bring the value of this contract with GrenTech to approximately RMB100 million. Most of these orders are expected to be delivered in the first half of 2008. The value of this order has already surpassed that of fiscal year 2007’s total contract value from this particular client. This winning bid not only signifies GrenTech’s position as one of the key RF product suppliers for this client, but will also drive the Company’s 2008 first quarter revenue from RF modules much higher than that of the first quarter of 2007.

Mr. Yingjie Gao, Chairman and Chief Executive Officer commented, “GrenTech is dedicated to the research and development of RF technology, and has accumulated extensive experience in the development of RF technology. As more global base station equipment manufacturers start to procure base station RF parts and components in China, and leading domestic base station equipment manufacturers expand their businesses, the landscape for base station RF parts and components in China is becoming increasingly promising.”

He continued, “GrenTech is a leading RF technology and product developer in China, as well as one of the fastest growing RF module suppliers. Our compelling and comprehensive know-how enables us to develop and manufacture various types of high quality and low cost base station RF parts and components for numerous standards, including GSM/CDMA/WCDMA/TD-SCDMA. Currently, the Company is one of the key suppliers of RF parts and components to major domestic base station

equipment manufacturers, such as Huawei and ZTE. In addition, we are in the product testing stage with three large global base station OEMs. In addition to our wireless coverage business, our base station RF business has grown to be another important product line and the key growth driver for GrenTech,” Mr. Gao concluded.

About China GrenTech Corporation Limited

GrenTech is a leading radio frequency ("RF") technology and product developer and a leading provider of wireless coverage products and services to telecommunication operators in China. The Company uses RF technology to design and manufacture wireless coverage products, which enable telecommunication operators to expand the reach of their wireless communication networks to indoor and outdoor areas, such as buildings, highways, railways, tunnels and remote regions.

Based on its in-house RF technology platform, the Company also develops and produces base station RF parts and components sold to base station equipment manufacturers. China GrenTech is a qualified supplier of RF parts and components to six major base station equipment manufacturers such as Huawei Technologies, ZTE, Datang Mobile, etc. For more information, please visit our website at <http://www.grentech.com.cn>.
